WHAT NEXT? BREXIT TOOLKIT

Introduction

Many people within the What Next? movement have expressed growing concern at the impact Brexit will have on the cultural sector. This has led us to form a sub group to discuss what we can proactively do to protect the work that we all do and ensure it can continue to thrive.

Brexit is a difficult and confusing process to follow and we want to arm you with information which might help you better understand the various options we as a country are facing in terms of Brexit and the impact they will each have on your work.

At the end of June (28th & 29th) the European Council (28 heads of government) next meet. They want workable proposals from the UK Government on the customs union, the Irish border and other unresolved issues left over from the December 2017 draft Withdrawal Agreement.

The draft Withdrawal Agreement is also where provisions for a transitional period (April 2019-Dec 2020) are set out, failure to reach a deal would also mean no transition.

The delay is entirely due the UK government who have not agreed on what it wants on many crucial issues and is delaying Brexit-related legislation coming to the House of Commons for fear of losing votes.

They will soon have to take a vote in the Commons on the 15 House of Lords amendments to the EU Withdrawal Bill. Some of these will be very close, depending on the Labour position and Tory rebels.

The Dominic Grieve amendment means that even after (if) they pass the Withdrawal Bill (i.e. adapt British legislation in preparation for Brexit) there will still have to be a vote on the final deal that Davis/May negotiate, expected around October 2018.

Regardless of how you voted, we all are connected by our passion and commitment to the cultural sector and the desire to maintain what we have in order to create great art for our audiences and communities.

We believe it is incredibly important that we act quickly to articulate the impact certain decisions within Brexit negotiations will have on our sector to those who have the power to do something about them. Serious lobbying is **URGENTLY** needed over the next week to target wavering Tory and Labour MPs to support certain amendments to the Withdrawal Bill

We are therefore asking you to make contact with your local MP and/or your Organisation's local MP, either via writing or in person and use the crib sheet attached and the two infographics to explain the impact various decisions will have on the cultural sector.

We are also attaching the amendments that are relevant to the ongoing prosperity of our sector.

We want to ensure our MPs are fully versed on the impact certain options currently being tabled will have on the cultural sector - it is surprising how many still don't fully realise the implications and YOU can make a difference.

The more specific you can make your information the better, so concrete examples from you about how certain actions will impact your work and the sector at large are really helpful for MPs to grasp the issues for your sector.

We encourage you to look at the link below so you can find your own constituency and if you hover over each constituency it gives an indication of the percentage vote to leave in the referendum, and whether the MP (as of March 2017, so some have changed) will have voted to trigger Article 50

What Next? Brexit and the Creative Industries

IT software a

Film, TV, video, radio and photography

IT, software and computer services ('creative tech')

eums,

Fig.1: The 'creative industries'. Creative Industries Federation, 2018.

The creative sector: a national success story

- The creative industries (fig.1) are worth £92bn a year to the UK economy. This figure is 7% of total GVA (5.3% of GDP).¹
- This figure is larger than for the automotive, oil and gas, aerospace and life sciences industries combined and has increased by almost 50% since 2010.²
- Creative industries are the fastest growing sector in the economy, growing at twice the rate of the wider UK economy.³
- There are 2 million people directly employed in the creative industries and 3 million employed in the wider 'creative economy'⁴ – which is one in eleven jobs.⁵ In London, this is one in six.⁶

The structure of the creative economy

- Creative jobs are regionally diffuse two-thirds of revenue was generated outside of London and the south-east.⁷. The sector is growing in every region in the UK, often faster than London; from 2010 to 2016 as high as 47% in Scotland and the north-east, compared to 33% in London and the south-east (fig.3).⁸
 - Currently, EU arts funding favours areas outside of London. As an example, England's highest Leave-voting areas currently receive twice the EU cultural spending than its highest Remain-voting areas.⁹
 - ➤ The European Regional Development Fund (ERDF) allocated just under €6bn to the UK for the period 2014-20, which is

cohesion and economic development since 1975 – will no longer be available. Why the Creative Industries are good for the UK:

directed overwhelmingly toward areas

Cornwall and west Wales are set to receive over €1000 per capita, the Tees Valley €280, Yorkshire €150 and Hampshire, Surrey and Kent €31. After Brexit, these funds – which have promoted regional and local social

outside of London and the south-east.

Quantitative data exist on the positive effects of creative engagement on an array of metrics; introspection, empathy, confidence, dealing with trauma, civic and community participation, physical and mental health, and academic attainment to name a few. The Arts and Humanities Research Council's comprehensive report 'Understanding the

value of arts & culture' details many of these in a

meticulous and nuanced fashion.¹⁰

- To take calculable results from just two studies: teenagers who engage in the arts are 20% more likely to vote as young adults, and children from lower-income families who engage in the arts at school are three times more likely to get a degree than their peers from similar backgrounds.¹¹
- In the post-Cold War and post-colonial world, soft power is perhaps the most powerful tool Britain has to deploy in international politics.
 - Portland Communications' authoritative 'Soft Power 30' rankings placed Britain as the global leader in 2015. We fell from the top spot in 2016 after the results of the referendum. We currently stand in second place, behind France.¹²
- DCMS and the wider government's goal is to promote the use of soft power by maintaining the UK's international position in arts, culture and heritage. To impede the growth of the cultural economy and raise barriers to cultural exports is to make this goal far more difficult.

What we want to maintain:

Talent and skills

- The creative industries depend on European talent to sustain them.
 - 75% of Creative Industries Federation members employ EU nationals and most say these jobs cannot be filled by British workers.¹³
 - ➤ There is a **demonstrable skills shortage** in the creative economy. The Migration Tier 2

¹³ Ibid.

- Shortage Occupation List (jobs where the government will permit sponsorship of migrants in recognition of severe skills shortages) includes 17 creative industries occupations.14
- Certain industries are completely reliant UK games companies draw 30% of their staff from the EU and the visual effects industry draw 25%.15
- The creative industries depend on the free movement of people and goods across borders.
 - Film and TV production, festivals, and touring companies rely on international markets. EU countries offer geographical convenience and come without the administrative and financial burdens of visas, among other 'nontariff barriers'. E.g. NoFit State Circus estimate that a US tour costs £46,000 more than an EU tour.16
 - Touring companies are defined as 'goods', for which a flat tariff under a 'no deal' Brexit would be prohibitively expensive.
 - Easy access to Europe has helped develop European audiences, which in turn generates revenue for the UK.
- International students are a vital pool of talent for the arts in the UK. Severing links to EU universities removes access to one of the most important pools of talent. 20% of students at the Royal College of Music, 16% at the University of the Arts London, and 13% at the Glasgow School of Arts were EU nationals.17

EU funding

- The creative industries embody a mixed model of profitability and public funding, in which the EU plays a vital role.
 - The UK receives more from Creative Europe than almost any other country and was second only to Germany in the amount it receives from Horizon 2020, a similar £80bn innovation scheme.18
- The EU schemes provide much more than funding, they build international networks often vital for arts organisations. Creative Europe offers 78 creative networks across 20 subjects. Collaboration is the lifeblood of the arts, and these networks are a lifeline for many.
 - If the government matches the funding but withdraws, we still lose important networks for the dissemination of best practice. knowledge and experience.
 - This works both ways for areas in which the UK is a leader, our creative organisations would not be able to lead on Creative Europe

projects, despite our expertise being invaluable for prospective partners.

Trade and investment

- The success of creative exports has depended on membership of the common market. 21% of Creative Industries Federation members say 'no deal' would make them consider moving their business abroad.19
 - 80% of exporting UK businesses trade with the EU and it is a highly popular market for first-time exporters, microbusinesses and SMEs (Small to Medium Enterprises). providing an easily-accessible training ground for companies wishing to develop export markets.20
 - Creative goods and services make up 11% of UK exports, and this is growing faster than any other sector. The EU receives 42.5% of UK creative service exports.21
- The creative industries are comprised of precisely the sort of people that have traditionally underpinned the British economy: small businesses and innovators. Smaller organisations do not have the funds or manpower to shoulder the cost of leaving existing trade arrangements.
 - One of eight UK businesses are located within the creative sector, totalling 284,000.22
 - 95% employ less than 10 people, and almost 70% turn over less than £100,000 annually (compared to the UK average of 55%).23
 - 47% of creative workers are selfemployed, compared to 15% in the national workforce.24
 - This puts the creative sector in a far more dangerous position as it is far more vulnerable to increases in cost or difficulty of travel.
- Looking outside the EU toward BRIC (Brazil, India, China, and Russia) or Commonwealth countries is no replacement for the current arrangement.
 - The UK's trade with the BRIC countries (Brazil, Russia, India and China), at £30.8 billion in 2016, is only very slightly larger than trade with a single member state— Ireland—at £26.7 billion. Government analysis suggests free-trade deals with non-EU countries, if reached, would add less than 1% to the long-term growth of the UK economy.25

InFacts guide: All 14 amendments made by Lords to May's EU Withdrawal Bill			
Amend.	Description	Date passed	Majority
1	To keep the UK in the customs union.	Apr 18	123
11	To protect EU rights (e.g. consumer, employment, environmental).	Apr 18	97
15	To keep the EU Charter of Fundamental Rights.	Apr 23	71
18	Technical amendment on legal challenges.	Apr 23	50
19	Technical amendment on legal cause of action.	Apr 23	58
31	For government to use Henry VIII powers only when 'necessary'.	Apr 25	128
49	To give Parliament a 'meaningful' vote on outcome of EU negotiations.	Apr 30	91
51	To give Parliament a say on future negotiations with the EU.	Apr 30	38
59	To reunite unaccompanied child refugees with relatives in the UK.	Apr 30	24
70	For 'sifting committee' to scrutinise Brexit secondary legislation.	May 8	31
88	To include intentions of Good Friday Agreement (i.e. no hard Irish border).	May 2	67
93	To continue to participate in EU agencies.	May 8	71
95	To remove the fixed exit date of 29 March 2019 from the Bill.	May 8	78
110A	To continue participation in the EEA - and therefore the single market.	May 8	29

Note, amendments that are most relevant to cultural sector that we can act on and make case for:

1, 11,15, 31,49,51,88, 93,95,110A
